Hanger from the publication:

ARCHAEOLOGICAL MUSEUM ZADAR

It's been created different hangers for gladius or pugio from the mobile bust of Augustus on the left or right with or without Victori that put a wreath on his head.

This time I creatively recreated perhaps the most beautiful hanger I found published on "ICONOGRAPHY OF A STELA OF A ROMAN CENTURION FROM THE ARCHAEOLOGICAL MUSEUM ZADAR"

In this case, the iconography here is a bust of Augustus right. Victory places a wreath on his head. And all this is in a rosette with a granular circle around the image.

The size I made is classic for all these hangers around 40 or 42mm. in diameter.

The silver-plated model similar to the original.

My creative wax model.

A suitable combination on wax for a gladius hanger!

The brass model of the hangers for gladius or pugio from the mobile bust of Augustus

A suitable combination on 2 gladius hanger!

The silver-plated model similar to the original.

It is desirable that on one of the hangers to have the bottom 1 ear so that the scabbard can be installed qualitatively.

Ready for action mounted on leather balteus.
